

HEAT EXCHANGER GASKETS

These gaskets are specially designed for plate and shell-type heat exchangers, ensuring leak-proof thermal exchange. Made from graphite, PTFE, EPDM, or NBR rubber; thickness: 1 mm to 5 mm. Available in clip-on or glue types; withstands temperatures up to 250°C and pressures up to 25 bar. Custom-cut as per OEM models. Widely used in food processing, chemical and pharmaceutical industries.
