

# STAINLESS STEEL ALLEN CSK SCREWS

Allen Countersunk (CSK) Screws have a flat head and hex socket drive, allowing flush installation for smooth finishes. Made from SS 304 and 316, sizes range from M3 to M20, lengths up to 100 mm. Threads conform to ISO metric standards. Ideal for machine assembly, panel mounting and precision applications in automotive, electronics and food-grade equipment where aesthetic and strength are equally important.
