

# STAINLESS STEEL CROSS FITTING

Cross Fittings provide a four-way connection in piping systems, usually for process control and distribution. Made from SS 304, 316, and Duplex, available in sizes ½" to 12", pressure rating up to Class 3000. Compliant with ASME B16.9, MSS-SP-75 standards. Ideal for systems requiring equal or unequal distribution of fluids, especially in chemical plants, refineries and fluid instrumentation lines.
