

# STAINLESS STEEL FEMALE ELBOW

Female Elbows have a 90° bend with two female threaded ends used for compact right-angle piping arrangements. Available in SS 304, 316, in sizes from 1/8" to 2", rated up to 6000 PSI. Standards include ASTM A182 and ASME B16.11. Common in compressed air, LPG lines and process fluid circuits for reliable, space-saving connections.
