

STAINLESS STEEL FEMALE RUN TEE

Female Run Tees feature two female threaded ends in line with a third female branch at 90° enabling three-way connections in a compact layout. Manufactured from SS 304 and 316, available in sizes from 1/8" to 1" with pressure ratings up to 6000 PSI. Threads comply with NPT/BSP standards; conform to ASTM A182 and ISO 8434-1. Used in pneumatic, gas and process instrumentation lines where easy assembly and corrosion resistance are essential.
