

STAINLESS STEEL HALF COUPLING

Half Couplings have a threaded or socket weld connection on one end used to join a single pipe to a fitting or valve. Made from SS 304, 316, 310 and Duplex grades, sizes range from 1/4" to 4", pressure classes from 3000# to 9000#. Standards: ASME B16.11, ASTM A182. Ideal for compact, high-pressure systems in chemical, gas and water pipelines where branch connections or equipment integrations are required.
