

STAINLESS STEEL HEX BOLT

Hex Bolts are standard six-sided head bolts used for fastening with a nut or tapped hole. Made from SS 304, 316, and 316L, available in sizes M6 to M64, with lengths up to 300 mm. Threads follow ISO and UNC/UNF standards. Grade A2-70 and A4-80 options available. Conforming to DIN 931/933. Used in construction, equipment fabrication and marine environments for strength and corrosion protection.
