

STAINLESS STEEL MALE ELBOW

Male Elbows offer a 90° turn with one male threaded end and one tube or socket weld end. Constructed from SS 304, 316 and 316L, available in 1/8" to 2" sizes, pressure rated to 6000 PSI. Compliant with ASTM A182, ASME B16.11. Used in gas supply, chemical transfer and automation piping systems where right-angle direction and strong mechanical connection are needed.
