

STAINLESS STEEL STUB ENDS (LONG & SHORT)

Stub Ends are used with lap joint flanges to provide a leak-proof, rotatable connection, allowing easy maintenance. Available in long and short types, manufactured from SS 304, 316 and 321. Sizes: ½" to 24"; Schedule: SCH 10 to XXS. Standards: ASME B16.9 and MSS-SP-43. Commonly used in food, chemical and water processing industries for systems requiring regular disassembly or inspection
