

STAINLESS STEEL TEE FITTING

SS Tee Fittings provide a 90° branch from a pipeline, facilitating directional flow distribution. Fabricated from SS 304, 316 and other grades available in equal and reducing types. Sizes range from ½" to 24" conforming to ASME B16.9 and ASTM A403. Ideal for high-pressure applications in oil & gas, pharmaceutical and marine industries requiring durable and corrosion-resistant flow connections.
