

STAINLESS STEEL UNION ELBOW

Union Elbows allow 90° directional changes with easy disconnection using union nut fittings. Manufactured in SS 304/316, sizes range from 1/8" to 1" tube OD, pressure rating up to 6000 PSI. Designed to ASTM A182, ISO 8434-1 standards. These fittings are used in compact instrumentation lines, chemical dosing systems and pneumatic controls requiring angular turns and frequent maintenance access.
